

Unleashing Insights from Unstructured Data

Capture transformative portfolio intelligence with AI-enabled technology that extracts unstructured data with unmatched accuracy.

In today's dynamic financial landscape, alternative asset managers face vast volumes of unstructured data. **73 Extract** transforms this into structured insights, enabling confident, strategic investment decisions.

73 Extract is your answer.

Trusted by leading private capital fund managers globally, **73 Extract** provides one-click data ingestion from portfolio companies in any format, enabling GPs collect more data points than ever before.

Unlock previously hidden portfolio insights with **73 Extract's AI-powered technology**.

With **73 Extract**, enhance human intelligence with structured, comprehensive, and consistent data, gaining a fresh perspective for smarter, more informed investment decisions.

Use 73 Extract to Analyze:

Data Types:

Tables

Covenants

Paragraph

ESG Reports

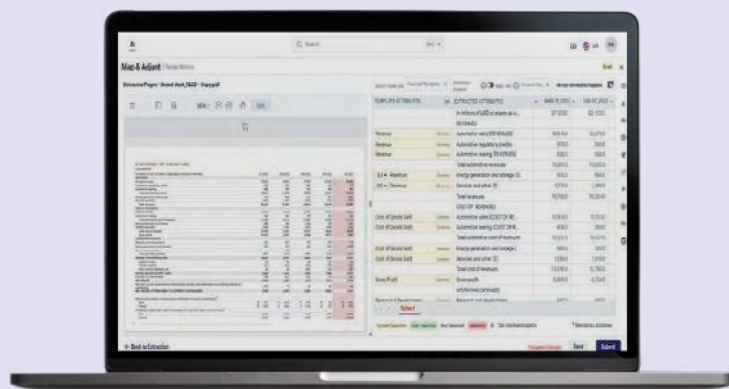

Charts

Email and Email Attachments

Formats:

.pdf, .csv, .xlsx, .pptx, .png, .jpeg and .docx (via Email Wizard)

Benefits

Unstructured Data Processing

Transform overlooked text, tables, and charts into strategic insights that drive better investment decisions.

Efficiency & Speed

Reduce reporting cycles from days to hours and free your team from manual data entry, allowing them to concentrate on high-value analysis.

Accuracy & Precision

Make decisions you can trust with 99% data extraction accuracy.

Auditability & Traceability

Stay compliant and confident with a comprehensive audit trail that traces every data point from source to final report.

Advanced Features

Automated Data Extraction

73 Extract eliminates manual data entry by automatically capturing business-critical information from unstructured sources, enabling faster, more confident decisions.

Natural Language Processing (NLP)

Our NLP engine interprets complex language, categorizes qualitative content, and captures context for deeper insights and integration with structured datasets.

Normalization and Structuring

73 Extract converts messy, unstructured data into clean, normalized formats that align with your internal models, ensuring consistency across your portfolio.

Scalable Data Management

Scale seamlessly. 73 Extract processes high volumes of data, helping firms monitor portfolios efficiently without added operational burden.

With 99% data extraction accuracy, 73 Extract delivers unmatched performance from any source, enabling scalable digital document processing, consistent data quality, and substantial efficiency gains.

Transform your data extraction with the power of AI.
