“As Blackstone continues to scale and the complexity of new product innovation in the alternatives space grows, we are constantly looking for best-in-class technology solutions to support our growth. What stood out to us about the 73 Strings platform was not only the modern tech and embedded AI capabilities, but also the deep industry expertise and tenured experience of the team. We are thrilled to be working with the 73 Strings team on their mission to modernize the private capital space.”

Robert Brooks,
Global Head of Valuations,
Blackstone

73 Intelligence turns complex data into a strategic advantage with advanced AI. It unifies middle-office operations, from portfolio data collection to real-time valuations, offering a holistic platform for alternative asset managers.
