

Augmenting Intelligence. Creating Value.

73 Intelligence is an award-winning, platform tailored for alternative investment professionals, solving key challenges in data extraction, portfolio monitoring, and valuations.

73 EXTRACT

Unleashing Insights from Unstructured Data

Unlock transformative portfolio insights with an AI-powered solution that ingests data from portfolio companies in any format. Capture portfolio data with a single click, giving GPs faster access to richer, more accurate data than ever before.

73 MONITOR

Precision Analytics for Actionable Insights

Access actionable insights, automate key metric calculations, and visualize your data with intelligent AI-ready structures that enable deeper analysis and smarter decision-making.

73 VALUE

Digitalizing Valuations in Equity and Credit

Take control of your valuation insights with AI, advanced analytics, and tailored workflows for faster, accurate, audit-ready results. Effortlessly scale to meet the evolving valuation frequency needs of institutional and retail investors.

ROI you can realize:

99%

99% Data Extraction Accuracy

Reduce errors and unlock superior business intelligence.

50%

Cut Valuation Costs

Achieve more frequent valuations at a fraction of the cost.

10x

Faster Valuations

Streamline workflows to drastically accelerate the valuation process.

90%

Reduction in Manual Tasks

Free up resources to focus on risk mitigation and smarter investment decisions.

“As Blackstone continues to scale and the complexity of new product innovation in the alternatives space grows, we are constantly looking for best-in-class technology solutions to support our growth. What stood out to us about the 73 Strings platform was not only the modern tech and embedded AI capabilities, but also the deep industry expertise and tenured experience of the team. We are thrilled to be working with the 73 Strings team on their mission to modernize the private capital space.”

Robert Brooks,
Global Head of Valuations,
Blackstone

73 Intelligence turns complex data into a strategic advantage with advanced AI. It unifies middle-office operations, from portfolio data collection to real-time valuations, offering a holistic platform for alternative asset managers.
