

Digitalizing Valuations in Equity and Credit

Take control of your valuation process with AI-driven insights, advanced analytics, and customizable workflows for faster, accurate, audit-ready results.

Valuations are essential for tracking and forecasting portfolio performance. With **73 Value**, fund managers gain a powerful solution to streamline and scale valuations across equity and credit investments, ensuring robust, compliant, and timely insights.

Whether you are a Private Credit, Private Equity, or VC fund manager.

73 Value is your answer.

73 Value is an award-winning solution that boosts efficiency, speed, consistency, and analytics, helping funds meet evolving investor demands of both institutional and retail investors while supporting internal strategic analysis.

73 Value aggregates and analyzes large volumes of structured and unstructured data, applies your chosen valuation methods, builds risk-mitigation scenarios, and streamlines reporting for stakeholders, investors, and regulators.

Use 73 Value For:

Benchmarking, Calibration, Scenario Analysis, Waterfall Analysis, Discounted Cash Flow Analysis, Transaction Comps, Trading Comps and more...

Benefits

Scale Effortlessly with Confidence and Speed

Use 73 Value's multi-strategy capabilities to scale and adapt your portfolio quickly, driving growth and returns without added complexity.

Increase Valuation Frequency

Use advanced AI algorithms to increase valuation frequency from monthly to daily, unlocking timely insights that enable you to act on market changes instantly.

Reporting Transparency and Confidence

Deliver transparent, AI-enhanced valuation reports that build trust and support faster, more precise decisions.

Audit-Defendable Valuations

Maintain a fully traceable audit trail that safeguards data integrity, strengthens compliance, and reinforces confidence in every valuation internally and externally.

Advanced Features

Automated Valuation

Automate valuations for equity and credit assets, reducing manual work while delivering accurate, professional-grade results.

Data Integration and Scenario Analysis

Seamlessly integrate data from multiple sources and run scenario analyses to evaluate potential outcomes, providing proactive risk management.

Customizable Reporting and Compliance

Create fully customizable, regulation-ready reports that align with specific internal or regulatory requirements and strengthen compliance while boosting stakeholder confidence.

Collaboration and Workflow Automation

Streamline collaboration and automate workflows to enhance efficiency across the valuation process.

73 Value is reshaping valuation and reporting, freeing your team to focus on human judgment instead of data wrangling.
